**III Semester- Question Bank (NEP)**

**PAPER III – CHILD DEVELOPMENT**

2 marks questions

1. What are Teratogens ?
2. What is Babinski reflex ?
3. Expand PKU.
4. What is Fetal stage ?
5. What is mutation?
6. What is Ultrasound technique ? give any 2 examples.
7. What is Fertilization?
8. What are fine motor skills?
9. Mention any two milestones of motor development.
10. What are Reflexes?
11. What is Apgar scale?
12. What is Sequential method?
13. What are parameters?
14. Mention the stages of prenatal development.

5 marks questions

1. What is a reflex ? Explain any two Reflexes.
2. Explain Teratogens affecting prenatal development.
3. Explain the physical development in childhood.
4. Discuss the longitudinal method with its advantages & disadvantages.
5. Discuss the effect of maternal diseases & infections on prenatal development.
6. Explain the sensory development during infancy.
7. Briefly explain the development of gross and fine motor skills in the Child Development.
8. Discuss the Down syndrome.
9. Explain the stages of child birth.
10. Explain the Apgar scale.
11. Explain the Reflexes in infancy.
12. Explain germinal stage.
13. Describe bodily growth & change in early childhood.
14. Explain cross - sectional method.
15. Explain the effects of any two Teratogens on prenatal development.
16. Explain the process of child birth.

17. What is sudden infant death syndrome.
18. Explain perceptual capacities in infancy.
19. Explain the development of memory in children.
20. Explain cell division.
21. Explain types of child birth.
22. Explain the secondary sexual characteristics in Adolescence.
23. Explain Ericson's theory.
24. Explain primary & secondary sexual characteristics.
25. Explain memory development in childhood.
26. Explain Urie Bronfenbrenner's ecological theory.
27. Explain any two genetic abnormalities.
28. Explain PKU.
29. Explain embryonic stage.

#### 8 Marks questions

1. Explain historical views on child Development.
2. Explain Piaget's theory of child Development.
3. Briefly explain the types of Chromosomal abnormalities.
4. Explain the methods of prenatal assessment.
5. Explain the characteristics of each stage of prenatal development.
6. Explain the emotional development during infancy.
7. Explain learning in infancy.
8. Explain the cognitive development during childhood.
9. Explain the stages of prenatal development.
10. Explain the sensory capacities in infancy.
11. Discuss the effect of maternal diseases & infections on prenatal development.
12. Explain the environmental influences on prenatal development.
13. Explain the bodily growth and change in childhood.
14. Describe the different Chromosomal abnormalities.
15. Describe the Reflexes.
16. Explain prerequisites of conception.
17. Explain Eric Ericson's psychosocial development theory.
18. Explain Urie Bronfenbrenner's Bio – ecological theory.
19. Explain the different genetic abno.
20. Explain the following
  - A. PKU.
  - B. Sickle cell anemia.
  - C. Sex determination.
  - D. Multifactorial transmission.
21. Explain the emotional development during infancy.

**DEPARTMENT OF PSYCHOLOGY**

**IV Semester- Question Bank (NEP)**

**PAPER 4 - Developmental Psychology**

**2 Marks question**

1. Define puberty.
2. Define Adolescence.
3. Mention any primary and secondary Sexual characteristics.
4. Mention the two eating disorders seen during Adolescence.
5. Define Juvenile delinquency.
6. What is Identity formation?
7. Mention 4 stages of Marcia's theory of Identity formation.
8. What is Growth spurt?
9. Define Substance abuse.
10. Define post formal thought.
11. Define trait.
12. What is co-habitation?
13. What is Emotional Intelligence?
14. Mention any two models of psychosocial development during early Adulthood.
15. Define Middle Adulthood.
16. What is Menopause?
17. What is Integrative thought?
18. Write any 2 characteristics of middle Adulthood.
19. Mention any two changes in psychomotor functioning during Middle Adulthood

**5 marks questions**

1. Write characteristics of Adolescence stage
2. Write importance of physical fitness during Adolescence
3. Mention the risk factor associated with drug abuse
4. Explain the formation of identity with reference to Erikson's Psychosocial theory of development.
5. Explain primary and secondary sexual characteristics in Adolescence
6. Write a note on genetic influence on health during early Adulthood
7. Write a note on marital and non marital lifestyle during Early Adulthood
8. Explain the importance of emotional intelligence during early Adulthood
9. Write a note on role of expertise and creativity during middle Adulthood

10. Explain the consensual relationship during middle Adulthood.
11. Explain the changes observed in women during menopausal stage
12. Write a note on distinctiveness of adult cognition.

**8 Marks Question**

1. Write a note on physical development during Adolescence
2. Explain the effect of addiction to social media and virtual gaming during Adolescence
3. Explain the various theories about identity formation during Adolescence
4. Explain Schaie's model of cognitive development during Early Adulthood
5. Explain the models of psychosocial development during early Adulthood
6. Write a note on health and physical development during early Adulthood
7. Explain the reproductive functioning changes seen during middle Adulthood
8. Write a note on cognitive development during middle Adulthood
9. Write a note on psychosocial development during middle Adulthood
