- Build the case for RPA testing.

- Describe the levels of RPA testing.

- Create basic and data-driven test cases for RPA workflows.

- Use the activity coverage tools of Studio Pro to assess whether RPA workflows are well covered by the test cases.

- Use mock testing to simulate real objects in RPA testing scenarios.

- Follow the good case practices identified by RPA developers from real automation projects.

Agenda:

- Introduction to RPA Testing

- Basic and Data-driven RPA Test Cases

- Mock Testing

- RPA Testing Best Practices

- Practice

-

Certificate:

Report on "Build Your First Automation with StudioX " for II Year Students

CERTIFICATION DETAILS:

DATE	: 26-10-2020
DURATION	: 3 hours .
BENEFICIARIES	: II year students
RESOURCE PERSON	: Online Training by UI Path Trainees.

On 26th October 2021 department conducted certification course from UI Path Academy known as "Build Your First Automation with StudioX" for II year students.

This Course aims to offer a direct experience on how students should set up their environment and build an attended automation using StudioX.

This course helps the students to develop first two automations after creating an account in UiPath Automation Cloud and installing StudioX:

At the end of this course, Students should be able to :

- Connect to UiPAth Automation Cloud, download the installer, and set up your attended automation environment.
- Build an auomtaion using StudioX
- Design your own learning journey on Academy.
