DEPARTMENT OF ZOOLOGY

**Interactive Workshop On The Occasion Of International Day for Biological Diversity.
On**

“CONSERVATION OF LAKES AND REDUCTION OF WATER FOOT PRINT”

Department of Zoology in association with Department of Botany and Eco-club-Prakruthi organized Interactive Workshop on “Conservation of Lakes and Reduction of water foot print” on the occasion of International Day for Biological Diversity on **22/05/2023**, i.e on Monday.

Dr. Santanu Gupta, Associate Co-Ordinator, Wetlands in WWF – India from Karnataka State Office, Bengaluru, has given introduction on WWF and International Day for Biological Diversity.

Ms. Mrudula, Project officer, WWF – India spoke on “Wetlands and reduction of water footprint”. She has explained about the water foot print which shows the extent of water use in relation to consumption by people for different activities in litres and can be calculated for any well-defined group of consumers like individual, family, village, city, province, state or nation. Advised not to waste water unnecessary and save for the future generation.

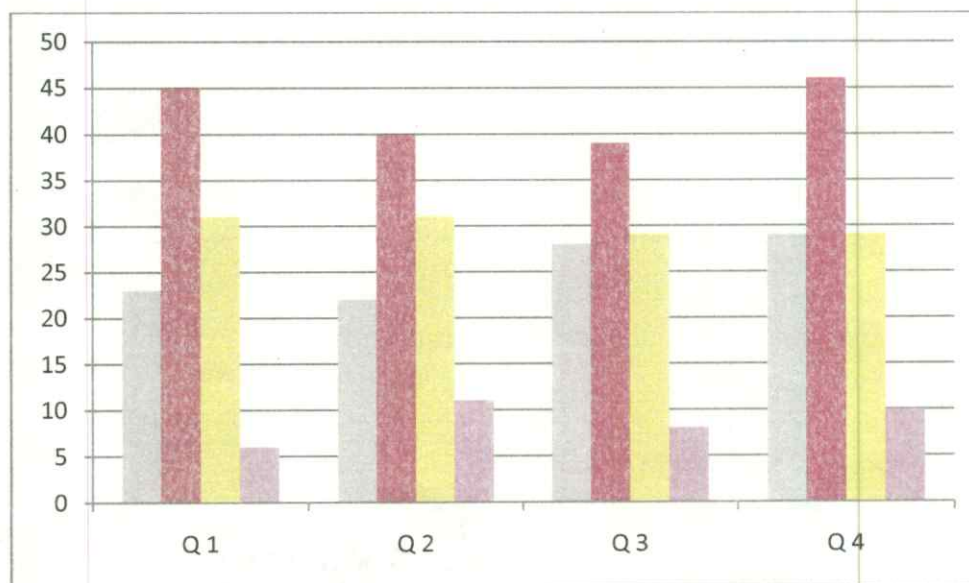

Mr. Chinmay C Maliye, Naturalist and Resource person for WWF-India spoke on “Urban diversity and present scenario”. Mr. Chinmay has explained about how the rapid urbanisation brings environmental problems like pollution, loss of green cover and large scale biodiversity loss. Biodiversity is key to healthy ecosystems and maintaining ecological equilibrium, the balance between different species in nature. Animals, plants, microorganisms and fungi perform many ecological roles and maintain what is called the trophic web. COVID 19 is increasing zoonotic in nature. Bird watchers have documented over 200 species of birds in the GKVK campus including clockwise L-R Coppersmith Barbet, Asian Paradise Flycatcher, White-eyed Buzzard and Indian Pitta. The rocky outcrops in the lower reaches of Nandi Hills are habitats for the Yellow-throated Bulbul endemic to Peninsular India. The planted evergreen forests on top of Nandi Hills are home to several Western Ghats species such as Nilgiri Wood Pigeon (right) and Tickell's Blue Flycatcher (left). Mr. Lohith, from WWF discovered a new spider species from Nandi hills and named it after the river Arkavathy as **Colopsus arkavathi**. Hesarghatta grasslands are the last remaining grassland patch in Bengaluru. Hesarghatta is vital habitat for grassland specialist raptors like Common Kestrels (left) and Montagu's Harriers (right) both declining in India. Lakes in Bengaluru are important habitats for over 100 species of birds including (clockwise L-R) spot-billed ducks, Northern Shovelers, Brahminy Kites and Spot-billed Pelicans. Lakes and surrounding areas are vital to livelihoods of Bengaluru's most marginalised residents. The periphery of the Hoskote Lake (left) is used for livestock grazing and reed collection by local residents. Building up lake peripheries such as in Ulsoor Lake (right) excludes these communities from accessing their traditional resources. Researchers continue to discover new species like this burrowing frog *Sphaerotheca* Bengaluru from the city.

On the completion of session all the students have taken pledge by signing on the board.

FEED BACK

Q No	PARAMETERS			
	FAIR	GOOD	VERY GOOD	EXCELLENT
Q 1	23	45	31	06
Q 2	22	40	31	11
Q 3	28	39	29	08
Q 4	29	46	29	10

Welcoming of Guest speaker and Principal
